DETAILED ACTION Part III

Claims 14-33 are pending. 1.

Upon a review of provisional Application 60/019,390, the instantly filed claims have an effective filing date of 7-23-97.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14, 17, 20, 21, 23, 25, 26 and 33 are rejected under 35

U.S.C. § 102(b) as being anticipated by Howard et al. (U).

Howard et al., teaches monoclonal and polyclonal antibody compositions against MADM. Specifically using a peptide sequence FDANQPEGKKC that shares 100% homology with residues 486-496 of SEQ ID NO.8 and shares 9 of 10 amino acid residues with SEQ ID NOS 4 and 6 to make the antibody (page 47, 2nd column in particular). This antibody would inherently specifically bind with SEQ ID NOS 4, 6 and 8 due to the high amino acid sequence homology between the immunizing peptide and the claimed sequences. Furthermore the immunizing peptide is located within the extracellular domain of SEQ ID NO. 4.

The prior art teachings anticipate the claimed invention.

- Claims 15-16, 18-19, 22, 24, 27-32 are objected to as being dependent upon rejected claims.
- communication or inquiry concerning this communications from the examiner should be directed to Patrick Nolan whose telephone number is (703) 305-1987. The examiner can normally be reached on Monday through Thursday from 9:30 am to 4:30 pm.
